

# Routing Mail through Zix *Google Apps for Business*

# Routing Mail through Zix Encryption

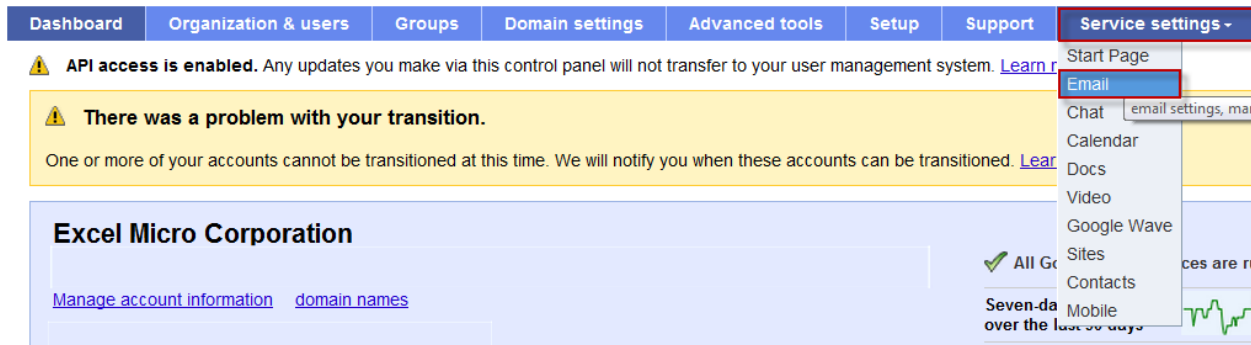

## Google Apps for Business

Below are the steps to follow to route your mail through your new Zix Encryption Solution. These steps are based off an administrative login through the Google Apps for Business interface.

1. Open a browser and navigate to your Google Apps Login URL and login with your administrative credentials

2. Click '**Service Settings**' then '**Email**'.

3. Scroll down until you see '**Outbound Gateway**'.
4. In the open box, type: **zixc2.strongport.com**
5. Scroll to the bottom of the page and click '**Save**'.
6. **\*NOTE\*** upon receipt of your Questionnaire, we will be submitting a case on clients behalf to enable TLS for outbound security, which is required to use Zix Encryption.
